Hydrology

Il bacino è delimitato a est dal Fosso Gora dell'Acqua Lunga e, da N a S lungo il confine corre il Canale Vecchio Gorile; questi canali confluiscono nel Collettore di Acque Basse che corre parallelo al Fosso Reale e al Collettore Sinistro di Acque Basse.

Il Collettore di Acque Basse poi confluisce nel Fosso Reale e questo nel fiume Bisenzio in Comune di Scandicci.

Il fiume Bisenzio confluiscce nel Fiume Arno.

Geology

Tutto il bacino del sito ricade su terreno alluvionale recente e attuale risalente all'Olocene.

Population, landcover and impacts

I dati demografici sono ricavati dal censimento ISTAT 1991. I comuni interessati sono Calenzano, Campi Bisenzio, Sesto Fiorentino.

Uses

Impacts

Estesa urbanizzazione nelle aree circostanti il sito e presenza di stagni limitrofi a quelli di Focognano interessati dalle rotte di migrazione dell'avifauna con intensa pressione venatoria. Presenza della discarica di Case Passerini accanto al bacino del sito.

Presenza di assi stradali e ferroviari e previsioni progettuali per allargamento e realizzazione di nuove infrastrutture

- Diffusione di specie esotiche di fauna e flora
- Inquinamento ed eutrofizzazione delle acque
- Artificializzazione di fossi e canali

3. Description

Area (Ha) 33,30

Description

L'area costituisce un residuo del paesaggio planiziale della piana alluvionale tra Firenze e Pistoia, all'interno del bacino del Fiume Bisenzio. I 5 specchi d'acqua sono temporanei con interventi di rinaturalizzazione e di recupero oltre che di gestione e mantenimento artificiale. Il sito fa parte di un complesso di laghi e stagni di origine spesso artificiale, formatisi o a seguito dell'escavazione di terra per la costruzione degli assi di comunicazione dell'autostrada e della ferrovia, oltre che per coprire la discarica di Case Passerini posta lungo il confine orientale dell'oasi, sia quali casse di espansione fluviale. All'esterno dell'ANPIL di Focognano gli stagni sono utilizzati prevalentemente a fini venatori. Anche all'interno dell'ANPIL della Querciola, nel Comune di Sesto Fiorentino è consentita l'attività venatoria.
